Abstract (en)

[origin: WO2007128510A2] The invention relates to the use of copolymers containing 10 to 90 percent by weight of polymerized monomers with heterocyclic basic groups in addition to other monomers while containing no vinylpyrrolidone as a monomer component, as additives in lacquers in order to improve adhesion of the solid lacquer film on a base. The invention also relates to hardened and soft polymer compositions containing copolymers which comprise 10 to 90 percent by weight of polymerized monomers with heterocyclic basic groups in addition to other monomers while containing no vinylpyrrolidone as a monomer component, as additives improving adhesion.
