Abstract (en)

[origin: US2008001917A1] The device serves to present visual information (2). It comprises a display unit (1) incorporating a screen (3), a control unit (5), an actuator unit (4) that is in mechanical linkage (6) with the screen (3) for movement of the same, and incorporating a position sensor (9) that is connected to the control unit (5) for detection of a current position of the screen (3). The control unit (5) comprises calculation means (11) for calculation of the visual information (2) to be displayed from at least one current base image, under inclusion of current image change parameters and of the current position of the first screen (3).
