Abstract (en)

[origin: WO2007129943A1] The present invention relates to a method and arrangement for managing a virtual meeting for at least two participants wherein each participant uses his/her mobile phone for communicating with the other participants and an identifier of each participant is provided to said arrangement, the arrangement comprises means for handling an entering procedure to the virtual meeting for each participant, means for handling a login procedure for each participant, and means for handling a startup procedure for each participant. The arrangement comprises means for identifying each participant during said procedures by the provided identifier whereby said identifier is associated with subscriber information adapted to be stored in on storing means connectable to the mobile phone used by the respective participant.
