Abstract (en)
The applicator has an eccentric screw pump arranged in a pump housing (32), which is in connection with a drive (22). A pump inlet (26) has a product feed with a flexible supply line and a pump outlet that contains an applicator nozzle (50). A rear handle (16) has a pressure sensor (20) for controlling supply of material. A stator (44) of the spiral pump is arranged between two axial clamping parts (42). The handle has a switch (18), which switches-on and switches-off the drive. A front handle (14) is provided for stabilizing the applicator in a utilization position.
