Abstract (en)

[origin: EP2017181A1] The packaging has an adjusting device comprising a recess and a slide element movable in the recess. The slide element is glued with two-dimensional guiding elements overlapping lateral edges and longitudinal edges of the recess. A sliding cover forms a closed transport packaging together with a goods tray in a transport position. The sliding cover is arranged inside a side wall (34) of the goods tray in a telescopic manner. The guiding elements are formed as a detachable part of a side wall (4) of the sliding cover.
