Abstract (en)
[origin: EP2017182A2] The packaging has a parallelepiped case with an opening closed by flaps (3-6). A retractable handle is arranged on a sliding panel (10) that slides between a return position inside a strip (2) and a partially deployed position outside the strip, in a space between the flaps (3, 4) in slots (51, 61) of the flaps (5, 6). The flaps (3, 4) include slats (31, 41) cooperating with the slots for maintaining the flaps (3, 4) against the flaps (5, 6). Returns are arranged on the sliding panel, and form an angle with the panel to stop against the flaps when the panel is in deployed position.
