Abstract (en)
[origin: EP2017404A1] A support for use in outdoor raised floors comprising a body (1) with an underside (2) for standing on the subfloor and an upper surface (3) for supporting the flooring tiles, the upper surface having spacer elements (4) in relief and defining four quadrants corresponding to four portions (11; 12; 13 and 14) of the body, the four portions being designed to support the corners of the tiles. In line with each of the four portions (11; 12; 13 and 14), there is a housing (5) forming part of the body (1) of the support and designed to contain corresponding coupling means (6), whose position with respect to the housing can be adjusted in height so that they can come into contact with the underside.
