Abstract (en)

A silencer device (221; 321; 421) for a fluid conduit (211; 311; 411) comprises a dissipating element (223; 323; 423) having orifices (219; 319; 419) and is characterised in that said orifices put the inside of the conduit in communication with the outside. The invention also concerns a method of manufacturing the device and is applied in particular to conduits of the air intake system of internal combustion engines
