Abstract (en)

[origin: EP2017527A1] The system has a fixation clip (105) provided on a mask, where the mask forms a monoblock piece with a reflector of a headlight. The clip has a clip head arranged in elongation of a clip foot (201), where the head has a thickness larger than that of the foot. The clip has a reinforcement (207) arranged below the foot, and a guiding element forming a projection at a locking face of a chamfer (204). The clip co-operates with a stressing tab provided on the mask to carry out a mounting operation of the mask on a headlight casing.
