Abstract (en)
[origin: EP2017864A1] The device has switching units (31, 32) on a support unit (3), and an intermediate switching unit (33) provided between the switching units. Actuating units (13, 14) actuate the switching units (31, 32) when an operating unit (1) is tilted around respective tilt axis, and a third actuating unit (15) actuates the intermediate switching unit when the operating unit is tilted around an intermediate tilt axis. Spring units (2) act between the operating unit and the switching unit (31), the operating unit and the switching unit (32), and the operating unit and the intermediate switching unit.
