Abstract (en)

[origin: EP2018078A2] The device has a housing (1) comprising an accommodating surface (11) for fixing an audio shoe (10). The accommodating surface comprises a fastening mechanism fastened with another fastening mechanism of the audio shoe in such a manner that the shoe is linearly fixed to the hearing device and perpendicular to the accommodating surface to make electrical connection between the hearing device and the shoe. The fastening mechanism has two slots arranged in opposite edge regions of the accommodating surface. The slots accommodate clips (12, 13) of the shoe.
