Abstract (en)

[origin: WO2007131492A1] The invention relates to a structural part of a vehicle, especially a vehicle roof part, which is at least partially produced from polycarbonate and to which a frame-type reinforcement is attached. The invention is characterized in that the frame-type reinforcement is a hybrid structure (2) which has a plastic reinforcing structure (4) that is firmly attached by welding, especially vibration or friction welding, in order to fix the hybrid structure (2) to the structural part (1).
