Abstract (en)

[origin: WO2007132065A1] The invention relates to a screen scoop and a power transmission module for screen scoop. The screen scoop comprises at least one separate power transmission module (4), which includes a body (4') forming a closed space 5 and a power transmission wheel for each screen shaft (2; 2a, 2b) of the screen scoop (1) which may be connected to be rotated by a separate rotating motor (3), in which case the shaft (9) of each power transmission wheel is provided with coupling members (13) which connect the screen scoop irrotatably to the ends of the screen shafts (2; 2a, 2b).
