Abstract (en)  
[origin: WO2007087764A1] The invention relates to a key element (110) for locking a hammer or bolt weapon (100), comprising a trigger bar (120) that can be displaced in a reciprocating manner by a trigger. To clearly and directly identify at a glance that the firearm is locked, the key element (110) is configured as a detachable component that can be fixed to the firearm housing.
