Abstract (en)

The system has a base, and side walls rising from the base, where the walls are transferable from an opened condition to a partially closed condition for loading or unloading goods. The walls have three retaining units, where two of the units are adjustably supported in a guide rail. The retaining units secure the loading goods from falling down in the partially closed condition of the walls. The retaining units are insertable into a special magazine (M1) in the partially opened condition of the walls. The units are connected with a container without disassembling in an inseparable manner.

Abstract (de)

Behältersystem (1) zur Aufbewahrung von Gütern, wobei ein Öffnungsbereich durch mehrere Sicherungsstreben (T 1 -T 3) in flexibler Anordnung versperrbar ist.
