Abstract (en)

[origin: EP2019161A1] Washing or washing-drying machine comprising top surface, a detergent drawer placed on the machine front upper wall, and provided with a front panel (4) with a top portion (5) partially extending on said top surface itself, means for the engagement and disengagement of said drawer into and from a related lodgement by a pushing on said front panel; said means comprise a push-push arrangement, composed by two devices able of interacting each other, whose one device is mounted on said drawer, and the second device is firm with the machine main frame. Said machine is provided with means able of automatically giving said front panel a lifting movement, and a contemporary lateral movement when it takes the end inner position of said push-push arrangement.
