Abstract (en)

The insert has a housing in which an electrical switching element that is operated by a rotor (16) is provided. The switching element is adjusted by an adjustment unit (22), which is provided in the housing, such that the element works as a key or a switch. The adjustment unit has two tappets (26, 28) that are movably supported in the housing and are coupled with each other by a prestressed spring (36). The tappet (28) forms a stopper for the rotor and the switching element. The spring is guided by guides (38, 40) having guide surfaces that are spatially separated from each other.

Abstract (de)

Ein Schalteinsatz für einen Schlüsselschalter ist mit einem Gehäuse versehen, in dem zumindest ein elektrisches Schaltelement vorgesehen ist, das von einem Rotor betätigbar ist, wobei in dem Gehäuse zumindest eine Verstelleinrichtung vorgesehen ist, mit der einstellbar ist, ob das Schaltelement als Taster oder als Schalter arbeitet. Die Verstelleinrichtung weist zwei in dem Gehäuse beweglich gelagerte Stößel auf, die miteinander gekoppelt sind.
