Abstract (en)
The invention provides a connector (10) for a coaxial cable (19), in particular a coaxial cable having a small diameter and comprising a centre conductor (21), a dielectric isolation (22), a shield conductor (23) and an outer jacket (24), with the following features: - an outer conductive housing (1), that is elongated and/or tubular, - an inner non conductive housing (5) with at least one opening (3,4) for at least one contacts (9,11), - wherein the outer conductive housing comprises at least one contact zone for electrically connecting a conductor of the coaxial cable - and a fixing means extending at least partially in the area of the contact zone of the outer housing for electrically connecting a conductor of the coaxial cable to the contact zone.
