Abstract (en)
[origin: EP2019533A2] The method involves storing Java(RTM: Object oriented programming language)-mobile information device applet (12) on a universal subscriber identity module-mobile phone card (10) connectable with a mobile phone (20). A smartcard web server (14) is installed on the mobile phone card, which is connected with the mobile phone over a data communication link. The Java(RTM: object oriented programming language)-mobile information device applet is installed by accessing a memory of the mobile phone card by the mobile phone over the data communication link. An independent claim is also included for a portable data medium comprising a processor.
