Abstract (en)

[origin: WO2007135256A1] A safety system for a seat (10) in a ski lift facility comprises first magnetic means cooperating with second magnetic means incorporated into the clothing of a passenger and capable of generating a position in which the passenger (17) is retained on board said seat (10) when the seat (10) is situated outside of the alighting area, and a releasing state upon entering an alighting area. The invention also relates to a method for implementing the safety system.
