Abstract (en)
[origin: WO2007131733A1] The invention relates to a method for controlled foaming of a filling material accommodated in bottles (2) or similar containers, under application of at least one spray nozzle (3), over which a liquid foaming medium is injected under pressure into the containers passing the nozzle, wherein the injection pressure is raised with increasing number of containers passing the nozzle per unit time, i.e. with increasing container count per unit time.
