Abstract (en)
[origin: WO2007134835A1] The invention relates to a method for increasing the bending strength and stability of wooden poles (1) as well as adequately stabilized wooden poles (1). According to the invention, metal films (2) which are wrapped around the wooden pole (1) in the ground-air zone and prevent xylophagous organisms from developing are attached and sealed with the aid of shrink films (3).
