Abstract (en)

[origin: WO2007134652A1] The present invention relates to a screw-in chain tensioner having a screw-in housing and having a tensioning piston which is moveably arranged in the screw-in housing, wherein the screw-in housing comprises a flange head and a screw-in sleeve which is arranged thereon. The flange head and the screw-in sleeve are two components which are produced separately from one another and are subsequently joined to one another. The invention additionally relates to a product series composed of at least two chain tensioners of said type and to a method for producing a plurality of screw-in chain tensioners.
