Abstract (en)

The invention relates to a carrying bag (1) comprising a first compartment (2) and a second compartment (3), separated from the first compartment (2). At least one of the first compartment (2) and second compartment (3) is configured to receive a sports product and contains an opening (5) arranged for exposing a portion of said product to the outside world. The first compartment (2) is arranged above said second compartment (3) in a carrying position of the carrying bag (1). The invention also relates to a method of manufacturing such a carrying bag (1).
