Abstract (en)

The present invention relates to an oil pourer (3) which comprises a pourer body (4) that is provided with a lip (5) designed specifically for oil and is suitable for being inserted in the mouth (101) of the container (100), in which the pourer (3) comprises restraining means (6) that prevent its removal from the mouth (101) of the container (100). The pourer (3) further comprises a valve for preventing refilling.
