Abstract (en)
[origin: EP2020705A2] The connector (12) has a horizontally separable housing and an exchangeable receiving device module for a connecting module (5) and a coupling module. The receiving device module includes an external form and modifiable and exchangeable inner form, which can be the connecting module and the coupling module. The inner form connects the horizontally separable housing at the receiving device module, where the horizontally separable housing accommodates the receiving device module which includes a cable inlet area (10).
