Abstract (en)

[origin: WO2007132426A2] Device (1) for making hair streaks, nuances and/or luminosities, comprising a set (30) of arcuated needles (3i) (i = 1,2,3,4,5...) operated simultaneously, each one of them being responsible for entrapping a distinct strand of hair, characterised in that it comprises a box (2) in which may translate a slide element (3) that operates as a single support of a set of needles that translate between two limiting positions, one of them where is defined a closed confined zone between an external surface (21) of said box and each one of the needles (31) and the other one in which the needles assume a position further apart from said surface, without the existence of any closed confined zone, being possible for the hairs to enter/exit freely into/from the zone defined by the arcuated part of the needles. A lever (25) operates a pin (45) of the slide element, and there is a handle (26). There are removable accessories, such as a comb, further handles or broad brushes (5, 5').
