Abstract (en)
[origin: WO2007136272A1] A device (1) for non-slip attachment of an article on an attachment surface that is wet and has a slippery coating, caused by residues of soap, shampoo or hair conditioner. The device (1) has a support structure (3), with a fastening side (4) facing the attachment surface (2). On the fastening side (4) there is provided a plurality of suction cups (5) and also a plurality of support bodies (6) for bearing against the attachment surface (2). The support bodies (6) have friction means which counteract sideways movement of the device (1) along the attachment surface.
