Abstract (en)

[origin: WO2007128935A1] The invention concerns a fluid product dispensing member (1) designed to be associated with a fluid product container (2) to form a fluid product dispenser, said member (1) comprising a body (11) designed to be mounted fixedly on a mounting component (3), the body (11) defining a housing (13) for receiving another component (13) of the dispensing member (13). The invention is characterized in that the housing (113) comprises a mobile portion (115) mobile from an initial configuration, wherein the housing is open, to a final configuration, wherein the housing is closed on the component (13), when the dispensing member (1) is mounted in the mounting component (3).
