Abstract (en)
[origin: GB2438023A] A method of construction comprising locating a track 10 for a mechanical erection working platform (MEWP) 50 within a partial building structure 80. The track is located such that it is supported by said structure and an MEWP is located in engagement with the track such that it can move within the structure in a guided manner. The MEWP is used to access parts of the structure above the height of the track during the installation of framework members 70. Also provided is a track assembly.
