Abstract (en)

[origin: WO2007133160A1] The present invention relates to a glazed door (1) comprising an insulating layer (4) and a glazing unit (5) set in an aperture (6) in the door (1). The invention is characterized in that the insulating layer (1) around the aperture (6) comprises a profiled section (14) designed to contain the glazing unit (5) in such a way that the profiled section (14) and the glazing unit (5) bear against one another and form a sealing bond.
