Abstract (en)

[origin: WO2007128731A2] The invention relates to a refrigerated product carrier (2) for a refrigeration device (1), comprising a refrigerated product container (3) that can be pulled out by means of a telescopic slide. Said slide has a guide part (14) that can be locally fixed in relation to the refrigeration device (1) and a free rail part (15) that can be arranged on the refrigerated product container (3). The guide part (14) and/or the refrigerated product container (3) have a rotatably mounted roller (16, 17), which engages in a running channel (30) formed by the guide part (14) and the free rail part (15). According to the invention, the front end region (34) of the running channel (30) is enlarged to permit the removal of the refrigerated product container (3).
