Abstract (en)

[origin: WO2007131896A2] The invention relates to a method for approaching a predetermined position of a carrier belt (2) which moves continuously in one movement direction, wherein a movement head (4) is moved to the predetermined position, wherein the movement head (4) is moved to the predetermined position in the direction of the movement direction at a speed which corresponds substantially to the movement speed of the carrier belt (2); wherein a procedure is carried out on the moving carrier belt (2) by the movement head (4) at the predetermined position.
