Abstract (en)

[origin: DE202006008709U1] The panel has two supply devices (2, 6), which are electrically connected with one another by connecting units. A bus branch (16) is provided at the connecting units, and grounding units are provided. The supply devices are connected with the bus branch over a three position switches (13, 20) having contact, separation and grounding positions. The supply devices are distant from one another in the horizontal and vertical directions.
