Abstract (en)
[origin: EP2022363A2] The container (1) has a container body (10) and a bottom (11) connected together by a fixed and liquid-tight connection (12) and forming a two-part structure of the container. The connection is provided as a welding connection. A transparent and translucent material is provided as container material. The container base body includes an inner wall with structures (3, 13), where the parts are formed as plastic-injection molded parts, respectively. The bottom is provided with a container opening. A marking is provided in a man part of the container for position determination.
