Abstract (en)
[origin: EP2022543A1] The connection unit comprises at least two cross rods (5a, b) that are joined together and spaced along the longitudinal direction (10) and having free ends on each side. There is at least one bearing block (7a, b) on each free end of each cross rod. The cross rod is turnably mounted around turning axles (17a, b) for fixing on runners (2a, b). Both turning axles are spaced apart relative to both cross rods. The connection unit (3) has at least one reset element. Steering of one of the cross rods is achieved around its turning axle as well as the bearing block.
