Abstract (en)

[origin: EP2022634A2] The regulator (03) has several control units (04) each arranged with a level of a printing stock (01) and roller (07), with a stroke unit (S07) of each moveable in the plane of a printer (01) and which can be individually set. Each control unit (04) is individually controllable and an electrically powered motor (13) is provided. The motor (13) connects by a rotation of a driven shaft (14) and arranged with the roller.
