Abstract (en)

[origin: EP2022903A2] The arrangement has fixing units arranged in end regions of a carrier plate (10). The carrier plate is provided with top and bottom hollow chambers (11, 12) extending in longitudinal direction of the plate. The carrier plate is attached at respective opposite ends under interconnection of preassembled mounting plate (18) to oppositely lying boundary walls. The carrier plate is held between lifting lugs (20) after mounting of the carrier plate. The lugs stick out from a broadside of the mounting plates, and engage in the chambers at ends of the carrier plate in supporting manner. An independent claim is also included for a method for a mounting a carrier plate with a fixing arrangement.
