Abstract (en)
[origin: EP2022909A2] The base (6) has a rope holding element (9), and a rope guiding element (10) with an opening for leading out an end of a rope loop from a rope loop case (1). The rope loop is receivable in a bent condition in the base such that the rope loop is held between the rope guiding element and the rope holding element, where the base, rope guiding element and the rope holding element are formed as a single-piece. The rope guiding element exhibits a wall thickness between 1 millimeter and 5 millimeters, where the base is made of plastic or injectable or deep-drawn material.
