Abstract (en)

It has an elongated, cylindrical configuration, there being defined a first and a second cylindrical section, with the first section having a smaller diameter than the second section, and with both having the same central, whereby the first section is arranged so that it carries a lightbulb and is the one that is actually housed into the headlamp housing, the second section being arranged for the passage of cables therethrough and is the one that remains outside the actual body of the headlamp and wherein the second section is provided with holes through which pass the cables for the supplying electricity supply to the lightbulb in the lamp socket, characterised in that it comprises some cone-shaped parts (20), the bases (21) of which are faced to said holes (8) for the passage therethrough of said cables.
