Abstract (en)

[origin: WO2007128734A1] The invention relates to a running wheel (17) for a refrigerated product carrier (2) that can be pulled out under the guidance of rails. The running wheel (17) has a roller (28) that is rotatably mounted on a single-wheel axle element (21), which can be mounted in a cavity (26) of a refrigerated product carrier (2), said roller being designed to engage in a running channel (30) formed by rails (15, 16). According to the invention, the axle element (21) has detent elements (23, 24, 25), by means of which it can be fixed to the refrigerated product carrier (2) and/or the roller (28) in an axial direction.
