Abstract (en)

[origin: US2007270237A1] Golf club products include a shaft member and a club head body member engaged with the shaft member. At least some portion of this club head product is made from a basalt material. As some more specific examples, the basalt material may be used in one or more of: one or more layers of the shaft member structure; the entire shaft structure; a grip member; a hosel member; one or more parts of the club head body member, including any of: a crown member, a sole plate or member, a body member, a ribbon member (forming a portion of the body member), a face member, a ball striking face member, a weight member, etc.
