Abstract (en)

[origin: WO2007131831A1] The invention relates to a portable power tool (2) comprising a drive motor and a tool (4) which is driven by the drive motor and which, during operation of the drive motor, performs an oscillating movement, on which a pendulous movement is superimposed. Provision is made for the tool (4) to move in a pendulous manner about a pivot axis (40) which moves back and forth along a path (44) of motion.
