Abstract (en)

[origin: US8177448B2] A writing instrument that includes a barrel having a front end, a fluid reservoir compartment, and a longitudinal axis. The writing instrument further includes a head disposed at the front end of the barrel where the head has a front part with an opening and at least one rib having a peak; a capillary connector having a front portion, a main portion having a diameter, a rear portion having a diameter, and a radial shoulder, where the capillary connector extends from the front part of the head to the fluid reservoir compartment; and a ring substantially coaxial with the longitudinal axis and disposed at a distance from the opening in the front part of the head. At least one air passage is formed between the ring and the barrel and the at least one rib extends in a radial direction between the ring and the barrel.
