Abstract (en)

[origin: EP1862393A1] The piece has an internal convex surface, an external concave surface and a peripheral soldering zone (4) which is fixed on an internal surface (5) of a lateral wall (2) of a package. The convex and concave surfaces comprise zones centered around an axis (3) and contacting with a tool utilized for fixing the piece to the lateral wall. A profile of a package's base (1) is defined by a circular arc of radius greater than or equal to half of semi-diameter of the piece.
