Abstract (en)

[origin: WO2007142706A2] A press forming-and-cutting method and a related device are structured to produce vinyl tile with rolled edges. A press forming-and-cutting die and related mechanisms are structured to form and cut vinyl tile that has been rolled and surface-finished to produce an end-product of vinyl tile with rolled edges in a single integrated operation. The press forming-and-cutting die is driven by a hydraulic press system.
