Abstract (en)

[origin: WO2007141382A1] The invention relates to an outer wall of a building, comprising a metal cell structure (1), an insulator structure (6) located against one side of the cell structure, and exterior cladding (9) located on the other side of the insulator structure, whereby the cell structure (1) is provided with bendable fastening elements (10; 11 ) forming an integral structure with the cell structure and intended for fastening other structural elements (6; 9) to be fastened to the cell structure. The invention also relates to the cell structure itself.
