Abstract (en)
[origin: WO2007125131A1] The invention relates to a temporary construction that includes a roof panel (201), a façade panel (111), and a component for attaching (204) the roof panel (201) to the façade panel (111), the attachment component (204) having one end intended to be attached to the roof panel and one end intended to be attached to the façade panel, one of the ends of the component including a hook able to engage with an orifice (212) provided in one of the panels (201, 111) or in an element (202) attached to the panel, in order to tension the component (204) so as to keep the roof panel (201) supported on the façade panel (111). The component may to advantage include a length adjustment means to tighten the attachment if necessary.
