Abstract (en)

[origin: WO2007131230A2] Video data may be extremely useful in online property commerce. However, the current methods of handling this video data fail to provide users of the data with effective and convenient ways of consolidating footage from multiple videos or portions thereof and conveying their particular viewpoints and other property features. Among other things, embodiments of the invention address these failures by providing methods and systems for generating and handling montage video data. Also, the embodiments of the invention address these failures by providing methods and systems for better handling of video data for property marketing, reporting, and analysis.
