Abstract (en)
[origin: WO2007141706A2] A method and system are disclosed, for rendering a plurality of markup language fragments comprises receiving markup language fragments, each markup language fragment belonging to either a base layer or to an extension layer (of which there may be more than one). A decision is taken, for the markup language fragments of each extension layer, whether to render those markup language fragments, the markup language fragments of the base layer are rendered, and, for each extension layer, if so decided, the markup language fragments of the respective layer are rendered.
